

Risk Management Policy

1. Purpose of the Policy

Denison recognises that its business activities inherently involve risk. Risk can present both threat and opportunity. Understanding and managing risks in a proactive and effective way is key to meeting our business objectives and increasing shareholder value.

Our approach to risk management is to recognise and manage the risks to our business in a consistent process in order that the individual and collective impact of risks can be understood and managed. It is everyone's responsibility to proactively identify, assess, manage and monitor risks in a sustainable manner that aligns with the strategic objectives of Denison.

This is achieved by:

- Establishing a culture that fosters positive risk behaviours throughout the organisation in our daily activities and decision making;
- Establishing a clear and transparent approach to escalating and reporting risks across the organisation;
- Applying our risk management framework to identify, assess, monitor, report and control risks to provide stakeholders with the assurance that risks are being effectively recognised and managed within the parameters defined by our risk appetite statement; and
- Ensuring risks consider impacts across the following key areas of exposure: health and safety, environment, finance, reputation, legal and compliance, business continuity and cyber security.

2. Application of this Policy

All Denison Personnel are required to apply this policy.

3. Accountabilities

The Board is responsible for overseeing the implementation and effectiveness of the risk management system, setting the appropriate risk appetite and the corresponding risk tolerance and the tone on risk management culture.

The Board has delegated:

- To the Risk and Sustainability Committee the responsibility of providing an objective oversight of the implementation and operation of the risk management framework system;
- To the Audit Committee the responsibility of providing an objective oversight over financial risks and reviewing internal controls; and
- To the executives and managers (Risk Owners) the implementation of this policy and the management of risk throughout the Company.

Management has delegated the treatment and review of risks to the appropriate level.

All Denison Personnel is responsible in their daily work for monitoring, treating, reporting and escalating risk to escalation authorities as follows:

Level of Risk before controls	Risk acceptance and escalation authority
Very High	<ul style="list-style-type: none"> Board of Directors CEO
High	<ul style="list-style-type: none"> CEO, COO, CFO, CCO,
Medium	<ul style="list-style-type: none"> Line Managers
Low	<ul style="list-style-type: none"> Site/Activity Supervisors
Negligible	<ul style="list-style-type: none"> Site/Activity Supervisors

4. Risk Management Practices

In order to properly identify and develop strategies and actions to manage business risks, the Company has put in place a risk management framework based on the following key elements:

- (a) accountabilities, risk ownership and escalation authorities;
- (b) a Risk Matrix providing an assessment of the potential impact of identified business risks and the likelihood of occurrence;
- (c) a Risk Appetite Statement providing risk guidance based on the objectives of Denison;
- (d) a business unit risk register and a corporate risk register recording:
 - a. the ranking of risks in accordance with the likely impact or consequence on the Company;
 - b. an assessment of the acceptability of each identified risk;
 - c. proposed actions to eliminate, reduce or manage each material risk; and
- (e) the assignment of the responsibilities for the management of each risk.

Risk management encompasses all areas of Denison's activities. Once a risk is identified, the risk management processes and systems implemented by Denison are aimed at providing the necessary framework to enable the risk to be managed.

4.1 Risk Management Framework

In order to guide Denison Personnel, this policy must be read together with the Risk Management Framework which describes:

- Denison's risk operating model based on the Three Lines of Defence;
- The process to identify, analyse, assess and treat risks;
- The identity of the risk owners and risk acceptance and escalation authorities;
- The way risk is reported up to, and reviewed by, the risk owners and ultimately the Board; and
- The types of controls and their corresponding effectiveness.

4.2 Risk Matrix

The risk matrix is an integral element of this policy as it provides guidance to assess risks based on the likelihood of the risk happening and the resulting consequence of it happening. It is used in the business unit risk register and the corporate risk register to assess risks before controls are applied and after controls are applied.

4.3 Risk Appetite Statement

The risk appetite statement provides general guidance on the amount and type of risk that Denison is willing to pursue or retain in pursuit of its strategic objectives. It is a key document supporting the risk management culture at Denison.

4.4 Risk Registers

The business unit risk register records and analyses risks pertaining to operations, and their corresponding controls.

The corporate risk register records and analyses the key enterprise risks and their corresponding controls.

5. Further information

5.1 Availability

This Policy is available on Denison's website at <https://denisongas.com.au/corporate-governance/>.

5.2 Training

Denison will provide annual training on this Policy to all Personnel for awareness and specific training regarding risks that are relevant for each position at Denison.

5.3 Monitoring and Review of this Policy

Amendments to this Policy require approval from the CEO.

This policy will be reviewed every two years and updated as required.

VER*	Approved By	Approval Date
3	Board	23/10/23
